

User Guide for Online Work Permit System

GENERAL INFORMATION:

The Online Work Permits System (OWPS) allows applicants for Work Permits to apply, make payments and submit supporting documentation online. The system is designed to automate many business processes e.g. Permit fee payment which was previously done manually. The main purpose is to integrate this system with the Government Electronic Payment Gateway (GEPG)

OWPS offers applicants with:

- Intuitive online user experience
- Ease of application completion with help information and relevant mandatory fields.
- Mandatory documentation identified per Permit Type with help information.
- Fast turnaround of Applications.

Given the benefits accruing to both applicants and the Department we would like applicants to now make their applications online.

It should be noted that for Data Protection purposes OWPS only retains applications from date of creation for a period of 28 days. After that time the draft application and any associated documents which have not been submitted are removed from the database and the associated Permit-ID is no longer valid.

GETTING STARTED

Access to Online work permit system is available through a web address <https://.....> The system is designed to be compatible with a multitude of mobile devices and browsers. On opening this url you will be brought to the Home page as shown.
